

ALL STAFF/FAMILIES/RESIDENT ALERT:

We have ***not*** received the final results of our facility wide testing from Monday 11/2/2020. However we have identified ***one positive staff*** person this week with our rapid test, we are awaiting confirmation of this test. Confirmation is obtained by doing a PCR lab test that can take up to 3-5 days to get the results. This staff is asymptomatic (no symptoms) and is now home monitoring for symptoms and off of work during the quarantine period. A more detailed letter will follow this week with the final results of our testing.

It is a requirement that we update you within 24 hours that we are aware of a positive test and at this time all other staff and residents continue to be monitored with no symptoms identified.

Sincerely,

Mark Rust Administrator

Kendra Hiles Director of Nursing
